

FIRE GLOW

Experience unparalleled performance with the powerful FIRE GLOW Ignition System. With upgraded internal components and safety features like Flame Sense, it's a great choice for anyone looking for a reliable and safe way to ignite their devices. From residential to commercial use, the FIRE GLOW delivers exceptional performance every time, making it the great choice for all your ignition needs.

HOW IT WORKS:

The FIRE GLOW is a powerful and dependable system for igniting your fire pit, with upgraded internal components to deliver unparalleled performance and reliability. It features our newest Flame Sense Technology, which automatically detects unusual climate behavior and promptly shuts off the gas supply for added safety.

You can effortlessly adjust the flame height using the built-in gas valve, and ignite the fire pit instantly with the spark feature. Plus, the FIRE GLOW operates without the need for any electrical power, simply powered by a AAA batteries.
